

Your Neuromodulator Treatment

What to Expect

- ✓ Depending on your treatment area, expect the treatment to take up to 30 minutes.
- ✓ You may experience side effects associated with the injection including localized pain, infection, inflammation, tenderness, swelling, redness and/or bleeding or bruising.
- ✓ You probably won't notice results for 24 – 48 hours after your treatment. Most people notice real improvement at 7 days, which may improve for up to one month.
- ✓ Talk with your provider about the right time to return.

7 Days Before Your Procedure

Avoid any over-the-counter medications that could cause blood thinning:

- ✓ Aspirin or aspirin-containing products
- ✓ Vitamin E
- ✓ Fish Oil

Inform your Provider

The following may affect when you may have your procedure or even if you will tolerate it. Specifically, if you

- ✓ are pregnant or suspect you may be pregnant, or if you are breastfeeding
- ✓ have any medication allergies
- ✓ have had a reaction to any botulinum toxin product
- ✓ are taking medications, vitamins, or over-the-counter medications, especially any blood thinning medications
- ✓ ANY recent change in your medical status

For 4 to 6 hours after Treatment

You should be able to go about your normal routine right after you leave our office.

Just a few guidelines – do NOT

- ✓ Massage injected area
- ✓ Lie flat for prolonged period
- ✓ Exercise vigorously
- ✓ Expose area to excessive heat (hot tub, sauna, tanning, sun)

Notes or Questions
